

# PyRuby

---

Today I saw a package called PyRuby in Github.  
The readme says:

PyRuby - Some Ruby for your Python!  
PyRuby is a simple way to leverage  
the power of Ruby to make your Python  
code more readable and beautiful  
.

### Usage

All you have to do is import the ruby  
module:

```
import ruby
```

From now on you should be able to write  
Ruby code within a regular Python  
module. An example:

```
1.upto(10) { |n| puts n }
```

Even PyPI has listed this as a package.

In the beginning I thought this was again a Ruby  
implementation by PyPy project. Or at least it use  
some magic trick to write ruby code directly in  
Python.

# Then I browse into the source code of it.

```

1 # -*- coding: utf-8 -*-
2
3 print("""

44

45 LOL U MAD?

46 """)

47

48 import sys

49 sys.exit(1)

Yes, indeed. The idea of using Ruby in Python is totally mad.
