Desktop Host Controller archlinux

[\[archlinuxcn\]](#)

[AUR](#)

```
$ pacman -Ss chrome-remote-desktop
```

archlinuxcn/chrome-remote-desktop 40.0.2214.44-1

Allows you to securely access your computer over the Internet through Chrome.

```
groupadd ID "chrome-remote-desktop"
```

Please create `~/.config/chrome-remote-desktop` folder manually, if it doesn't exist, or else you can't use CRD. The needed files are created by the Chrome app, inside the `chrome-remote-desktop` folder, after Enabling Remote Connections. To {enable,start} the service use `systemctl --user {enable,start} chrome-remote-desktop`

You may need to create a `~/.chrome-remote-desktop-session` file with commands to start your session

Go to <https://support.google.com/chrome/answer/1649523> for more information.
