

# PyRuby

Today I saw a package called PyRuby in Github. The readme says:

PyRuby – Some Ruby for your Python!

PyRuby is a simple way to leverage the power of Ruby to make your Python code more readable and beautiful.

## Usage

All you have to do is import the ruby module:

```
import ruby
```

From now on you should be able to write Ruby code within a regular Python module. An example:

```
1.upto(10) { |n| puts n }
```

Even PyPI has listed this as a package.

In the beginning I thought this was again a Ruby implementation by PyPy project. Or at least it use some magic trick to write ruby code

directly in Python.

# Then I browse into the source code of it.

It contains only one file: ruby.py

```
1  # -*- coding: utf-8 -*-
2
3  print("""
4
5                                     `.-:/+ossyhddmmmm

42      `:+ydmNMNNNNNNNNNNmdhys+/:.``
43      ``.....`
44
45      LOL U MAD?
46      """)
47
48  import sys
49  sys.exit(1)

```

Yes, indeed. The idea of using Ruby in Python is totally mad.
