

PyRuby

Today I saw a package called PyRuby in Github.
The readme says:

PyRuby - Some Ruby for your Python!
PyRuby is a simple way to leverage
the power of Ruby to make your Python
code more readable and beautiful

.

Usage

All you have to do is import the ruby
module:

```
import ruby
```

From now on you should be able to write
Ruby code within a regular Python
module. An example:

```
1.upto(10) { |n| puts n }
```

Even PyPI has listed this as a package.

In the beginning I thought this was again a Ruby
implementation by PyPy project. Or at least it use
some magic trick to write ruby code directly in
Python.

Then I browse into the source code of it.

It contains only one file: ruby.py

```
1  # -*- coding: utf-8 -*-
2
3  print("""

44

45 LOL U MAD?

46 """)

47

48 import sys

49 sys.exit(1)

Yes, indeed. The idea of using Ruby in Python is totally mad.
