Write a program to keep CPU usage as sin funcion

Imported from: renren.

It is said that this is a problem from interview of Microsoft. Write a program, which makes the CPU usage curve in Windows Task Manager shows a Sin function.

The program below is written in java:

```
public class sincpu {
1
       private static final int cycle=1
024.tick = 256:
3
    public static void main (String[]
args) throws InterruptedException {
            for(int i = 0;;i++){
4
                work(calcNextSleep(i % c
5
vcle));
                sleep(tick - calcNextSle
6
ep(i % cycle));
7
8
       }
9
10
        private static long calcNextSleep
(long i){
11
            return (int)(Math.sin((double
)i * 2 * Math.PI / cycle) * tick + tick)
/ 2;
        }
12
13
14
        private static void sleep (long
sleepTime) throws InterruptedException
15
        {
16
            if(sleepTime < 2)</pre>
17
                Thread.yield();
            else
18
                Thread.sleep(sleepTime);
19
```

```
20
        }
21
22
        private static void work (long p
eriod) {
23
            long start = System.currentT
imeMillis():
            for(;;){
24
25
                Math.sin(1);
26
                 if(System.currentTimeMil
lis() - start >= period)
27
                     break;
28
            }
29
        }
30 }
```

Be careful you need to turn off other cores if you have multi-core CPU.
